VITAL STATISTICS OF THE UNITED STATES, 1975
VOLUME II — MORTALITY

PART B

Section 7. Geographic Detail for Mortality

Total number of deaths, deaths from selected causes, infant deaths, neonatal deaths, fetal deaths, and selected rates and ratios. Tabulations shown by each State and county, specified urban places, metropolitan and nonmetropolitan counties, population-size groups, and standard metropolitan statistical areas.

Section 8. Guam, Puerto Rico, and Virgin Islands (U.S.)

Trend of the crude death rate. Frequency tabulations for most of the characteristics shown in other sections of Volume II.

Complete contents pages for Sections 7 and 8 are on pages 7-1 and 8-1. Sections 1 through 6 are in Part A of Volume II of *Vital Statistics of the United States, 1975.* Section 6, the Technical Appendix, discusses the factors affecting the collection, classification, and interpretation of the mortality statistics.

Guide to tables in Section 7

[All data are for deaths occurring in the United States during 1975. Excludes fetal deaths. Data for geographic areas within the United States are by place of residence unless otherwise noted. Data by place of residence exclude deaths occurring to nonresidents; however, data by place of occurrence include deaths to nonresidents]

Table 7–1. Total, Infant, and Neonatal Deaths, and Fetal Deaths, by Race: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1975

[Data by place of residence exclude deaths occurring to nonresidents; however, data by place of occurrence include deaths of nonresidents. Fetal deaths include only those for which the stated or presumed period of gestation was 20 weeks or more; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1970 and are incorporated unless otherwise noted. Figures for "Negro" are shown separately for those counties and urban places in which the 1970 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

Table 7–2. Total Deaths, Infant and Neonatal Deaths and Rates, Fetal Deaths and Ratios, by Color, for Population–Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1975

[Fetal deaths include only those with stated or presumed period of gestation of 20 weeks or more; see Technical Appendix. Infant (under 1 year) and neonatal (under 28 days) mortality rates and fetal death ratios per 1,000 live births in specified group. Urban places in metropolitan counties are those with populations of 10,000 or more; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000. For definition of areas, see Technical Appendix]

NOTES

Occurrence and residence allocation

In contrast with the method of allocating deaths to place of residence for each of the 50 States and the District of Columbia, residence data for the Commonwealth of Puerto Rico include only those deaths to residents of Puerto Rico occurring in Puerto Rico. Deaths to nonresidents occurring in the Commonwealth are included in occurrence mortality statistics, but are excluded from residence mortality statistics. Deaths to residents of Puerto Rico occurring elsewhere are excluded. The same qualification applies to resident deaths in the Virgin Islands and Guam. Exclusion of these nonresident deaths from resident mortality statistics began in 1970. Before 1970 resident mortality statistics for Puerto Rico included all deaths occurring in Puerto Rico, with deaths of nonresidents of Puerto Rico assigned to place of death.

Data are shown by both place of occurrence and place of residence in Puerto Rico for the primary geographic subdivision, the "municipio," and in the Virgin Islands for St. Croix, and St. John and St. Thomas Islands. Deaths by place of residence are shown for municipios only and not for urban places for Puerto Rico; however, for the Virgin Islands they are shown for Charlotte Amalie, the only urban area having a population of 10,000 or more.

Race and color

Deaths are not shown by color for Puerto Rico and Guam; they are classified as white and all other for the Virgin Islands.
