

2022 HYST Procedure/SSI Medical Record Abstraction Tool

For use in acute care hospital SSI validation following inpatient HYST procedures performed during Q1-Q4, 2022. **Refer to associated 2022 MRAT instructions.**

1. Patient and Medical Record Identifiers			
State	Facility (NHSN) OrgID	Date of Audit	Reviewer Initials
Patient ID		Patient DOB	Gender: F M
Facility Admission Date 1 (for index HYST Procedure)		Facility Discharge Date 1	
Review Start Time:	End Time:	Time spent reviewing record (minutes):	
HYST Procedure Date: __/__/2022 (USE THIS TOOL ONLY FOR HYSTs PERFORMED IN 2022)		Describe in words all procedure(s) performed during index HYST procedure (for example, hysterectomy, bilateral salpingoophorectomy (BSO), Cesarean section, appendectomy):	
Link to SSI section for ICD-10-PCS and CPT codes can be found in the "Supporting Materials" section of the link below: http://www.cdc.gov/nhsn/acute-care-hospital/ssi/index.html			
ICD-10 codes: _____; _____; CPT _____; _____; _____ List all codes applicable to the index procedure.			
Record later admission dates below only if they occur within 30 days of HYST procedure (Procedure date = day 1 of 30).			
Facility Admission Date 2: __/__/____		Facility Discharge Date 2: __/__/____	
Facility Admission Date 3: __/__/____		Facility Discharge Date 3: __/__/____	
2. NHSN Operative Procedure Criteria			
Did HYST operative procedure meet NHSN definition for inpatient operative procedure? (Refer to NHSN PSC Module SSI Chapter 9)			
☐ No	If No, STOP, record (a) Not a candidate HYST: Did not meet NHSN Operative Procedure definition		
☐ Yes	If Yes, proceed to 3.		

3. Document HYST Procedure Risk-Adjustment Variables in Medical Record at Time of Procedure for Comparison to NHSN	
Closure Technique (Select one):	Primary Other than primary
Diabetes (Select one):	Yes No
ASA physical status (ASA score) (Select one):	1 2 3 4 5 (If ASA=6 these patients are not eligible for SSI surveillance)
General anesthesia (does not include conscious sedation) (Select one):	Yes No
Scope (Select one):	Yes No
Emergency (emergency or urgent procedure per facility protocol) (Select one):	Yes No
Trauma (blunt or penetrating injury occurring prior to start of the procedure) (Select one):	Yes No
Gender (Select one):	M F Other
Age (years):	
Height:	__ feet/ __ inches OR __ meters
Weight (most recent documented prior to or otherwise closest to the procedure):	__ pounds OR __ kilograms
Wound class (Select one):	C CC CO D

HYST procedure duration	Procedure start date	Procedure start time	Procedure finish date	Procedure finish time
Index procedure				
2 nd Procedure within 24 hours				
Procedure duration (derived from above information): _____ hours and _____ minutes				
4. Document Subsequent Surgery / Invasive Procedure During HYST SSI Surveillance Period				
☐ No	If no, proceed to 5.			
☐ Yes	If yes, document additional procedure(s) and dates for consideration and proceed to 5.			
Invasive procedure 1:		Date 1:		
Invasive procedure 2:		Date 2:		
Document any evidence of infection during invasive procedures above:				
5. Additional / Post-Discharge Infection Surveillance				
☐ No	If No, proceed to 7.			
☐ Yes	If Yes, abstract information regarding infection status in the space below, and proceed to 6.			
6. Document SSI Definition Criteria				
Using the NHSN SSI Definitions Criteria on the instruction sheet, document which depth of SSI criteria were met and the date of SSI event (date when the first element used to meet NHSN SSI criterion occurred).				

7. Outcome of 2022 HYST SSI audit		
7(A): Select (a), (b), or (c); If (b) is selected, define depth and date of SSI event, then proceed to 7(B):		
☐ (a) Not a candidate HYST: Did not meet NHSN Operative Procedure definition		
☐ (b) SSI: (select deepest level met during SSI surveillance period)	☐ (b1) Superficial incisional SSI	Date of SSI event (date SSI met the deepest level of SSI during the SSI surveillance period):
	☐ (b2) Deep incisional SSI	
	☐ (b3) Organ/Space SSI (Specify site): OREP IAB VCUF	
☐ (c) No SSI		
7(B) Was there evidence of infection visualized (seen) and documented within the narrative portion of the operative note of the index surgical procedure and at the same tissue level of the subsequent SSI event?: Yes No For details on Infection present at time of surgery (PATOS), refer to NHSN PSC Manual SSI Chapter 9 (SSI Event Reporting Instruction #3).		
8. Attribution of SSI to Procedure		
Was the SSI attributable to the HYST, or was the SSI attributable to another invasive concurrent NHSN Operative Procedure, or was this not an SSI due to invasive manipulation of the HYST operative procedure site after the HYST procedure? (Select one):		

- ☐ HYST SSI
☐ SSI not attributable to HYST; SSI attributable to (specify): _____
☐ Not an SSI; invasive manipulation occurred (specify): _____

9. Case Determination	
☐ Correctly Classified	☐ Overreported HAI
☐ Underreported HAI	
If HYST SSI was misclassified (over- or underreported), identify the reason(s).	
<u>Additional Reasons</u> ☐ Missed case finding ☐ Clinical over-rule ☐ Used outdated criteria ☐ Diagnostic test results not in chart ☐ Other _____	<u>SSI criteria misapplied</u> ☐ ICD-10-PCS and/or CPT code(s) not a valid NHSN operative procedure code for surveillance ☐ Date of event outside the SSI surveillance period ☐ SSI should have been attributed to another invasive concurrent NHSN Operative Procedure ☐ Not an SSI due to invasive manipulation of the HYST operative procedure site after the HYST procedure ☐ Reported organ/space infection did not meet at least one criterion for a specific organ/space infection site listed in PSC Manual Chapter 17 ☐ SSI reported at incorrect tissue level (specify): _____ ☐ O/S SSI reported at incorrect specific organ/space infection site (specify): _____ ☐ PATOS incorrectly applied ☐ Other _____ Provide any additional details:

Don't forget to record the abstraction end time on page 1 Location of elements meeting criteria within Medical record:

_____)
